

May 14, 2019

Chairman Dakkra's speech to the People of Earth:

This is Chairman Dakkra of the, known to you on planet Earth, Andromeda Council. This interdimensional, intergalactic and interplanetary governance and development body, this great council, is, if you will, the "Mother" council of all its member high councils.

In deep space, and our biospheres, it is known by our Ambassadors & Diplomats as the: *Galactic Council*.

It is an honor to be with you, Tolec who is Head of the Council's Earth human relations' matters on the Council's: "Joint Earth Council" sub-committee; and Adona of Star Ancestry who is Andromene, Director and Head of our Council's sub-committee, Interdimensional Telepathy and Communication - Observation and Advisory Board. They have been with our Council team for thousands of your Earth years.

I, Chairman Dakkra, have been continuously informed about your ongoing Earth activities from our incarnated Star members during their sleep state, on Earth, to debrief us about their own life experiences, observations and recommendations, as well as those higher dimensional members that are aboard the Council's Primary Biosphere from their own different departments for observation, discussion and assistance to affect any potential clearing needed on a person by person basis, and/or implement specific broad based solutions for Earth's people. As per protocol, I review all reports, make sound decisions along with the rest of the members of the Council to act upon certain ideal procedures regarding Earth's challenges, and provide assistance when needed to areas of the Earth that need our attention.

It is the goal of our Council to implement and follow the course that our Source and Universe have mapped out for us in readiness for Earth to enter into the intergalactic family of star systems and planets that are under our umbrella, so to speak. We will continue to monitor the Earth's activities, and all life that exists within Earth, along with the constant changes within the Universe as well.

We have already placed the chosen team members in certain areas upon the Earth to provide appearances of different star crafts and contact with awakened star family members in the last few years.

Azar, our Chief Medical Officer, has her team of people from the counseling, medical and educational sections to monitor and upgrade the changes within the energy fields, aura fields and soul essence fields in the speed in which the consciousness of humanity can readily handle in their own levels of awakening.

Azar indicated that there are not many of humanity that are ready for this change as they are still in the remnants of old belief programming. She is doing everything that she can in her own higher dimensional knowledge of the healing arts within the Star Nations' including additional healing methods as shared by our Council members - to speed up the sound frequencies, symbolic imagery and universal vibrations that are coming in from outside this solar system in a way that can be readily accepted by the Earth human organic form without it going into a 'tailspin' from high level organic tensions, stress of what is happen-

ing to the organic form and consciousness disruption in lack of understanding about the changes that are ongoing within the organic human form.

According to Azar, awakened incarnated star people within their Earth human organic forms are not exempt from the outside world's lack of consciousness. Azar has observed that these awakened ones can have a difficult time to experience the multitude of people not yet awakened to their own consciousness, or beyond. She said that it is easier for people to follow mundane tasks, day after day, year after year.

It is much harder for those of you who are awakened to live in the middle of non-awaken family and friends. You are thousands of years ahead of these people in developing the healing arts, telepathic communications, free energy technology, Universal education, mental abilities, experiencing different timelines/portals/dimensions, knowledge of past/present/future and observation of manifestations from other realms that comes to you daily as you get accustomed to them. What you need to realize is that everyone will get there, eventually. Some of Earth's humanity may take longer than you awakened ones to reach their unique level of awakening. It is alright to be where you are and allow them to be where they are in life.

To those of you who are concerned about the Earth changes. Our higher dimensional scientists, geologists, symbologists, star mappers, technical engineers, masters of sound and energy, and healers are working together as Star Nations' team members to design, build, create and provide the pure energy materials to work with Earth's planetary energy fields, grid systems and components of Earth's makeup to buffer the oncoming and ongoing energy changes that is going on with the Universe in its upgrades to the next level of density & dimension that also adds a new dimension to its Universal mapping of the grids in its geometric form and sounds.

Humanity has yet to be trained in the arts of pure energy while the remnant few power holders kept humanity in the lower levels of energy output in the old creation of industries to keep humanity enslaved to its needs.

It is up to us as the members of the Council to provide the road map within awakened humanity whose soul essences have the gift of engineering and technological insight to create and build these new technologies that can be readily used to provide energy sources, food platforms and clean air/water tanks to return the planet's environmental state into a state of cleanliness and purity of clear skies, land and water systems. It will take time to transform them into a better source for all of humanity. Our Star people already have been sent to certain organizations that are working without the assistance of the government funds to create these energy and pure devices to be readily available to the cities on Earth. It will cost humanity nothing in term of the monetary system that you are still under at this moment in time. These devices will be shared to all of humanity.

Now, I, Chairman Dakkra want to address you as family members of the Stars who are incarnating on Earth right now. I have loved the people of Earth for a very long time. I have experienced many lifetimes on many worlds without number. I do honor, love, care and respect all level of life forms in the Universe.

Even though I have never incarnated on planet Earth, it is a very special planet to me. It is for this very reason that I am in the Chairman's seat, in this very position on the Council, to oversee this planet, its changes and its people.

People of Earth, you are stronger than you realize consciously, unconsciously, sub-consciously and soul level of yourselves. I have watched you grow from civilization to civilization, raising your own vibrations slowly over thousands and thousands of years. I have seen you crumble, fall and yet, you rise up again and again within the Earth's time-lines.

You, my brothers and sisters, can move mountains if you choose to do so. Have faith within your own hearts, minds & souls in that you can overcome the challenges of your daily life. Look up to the skies, watch for us. We are here closer than you can imagine. Our Star people are watching over you for you are members of their own families from their own star systems.

Our Star people miss you just as much as you miss them. They are waiting for you to ask for their help on many things. Your Star families want to give you what you have forgotten since your birth into this world. Many of the Star families are excited that there are those of you who are awakened and acknowledge their presence on Earth. Do you realize that they have been waiting for thousands of years for you to awaken to them? How much more do they jump for joy and celebrate your return to them by telepathy, sleep state and finally, transform your bodies to enter their own dimensions...the final return to each other.

I say to you, star family members that are incarnated on Earth, be of encouragement, for we are walking beside you every day, monitoring your every step on this planet. I say to you, brothers and sisters in the organic form, walk with your head up high and look up to the skies for help comes to you in form of our star families. I say to you, people of Earth, do not give up "hope" at any level of your own life experiences. I say to you, humanity, you are never alone...physically, mentally, emotionally and spiritually. I say to you, people of Earth, we of the Council form a circle at the end of each meeting, we stand up, hold hands and set our minds to planet of Earth and the people of Earth with love, healing, strength, and comfort in that we are all one in spirit.

Once a month, our Council members and I join with other Galactic Councils to send our love and healing to all planets in need including Earth. The images that are being displayed within our own telepathic minds formed together we do so for those planets that are in need of our focus. Earth happens to be one of the challenging planets that we, the galactic beings, are aware of and therefore, we spend more time working with Earth's people by continuously sending love, healing and light to them.

As I close this letter to the people of Earth, I, Chairman Dakkra, and all the Council members, keep you in our hearts forever. Know that we love you to the Source and back.

Humanity, you are a special organic forms of Light that we see as sparkles of Light from our biospheres, motherships and scoutcrafts that circle your skies.

As the Native Americans would say...Mitakuye Oyasin! Oyate Wicahpi! We are all related. People of the Stars. Thank you for your time to hear my speech.

~ Chairman Dakkra
